Isotype: Mouse IgG1

**DESCRIPTION:**

Cedarlane’s Purified Anti-Human/Mouse Complement Component C3 monoclonal antibody (Clone: 6C9) reacts with human and mouse C3 as well as the breakdown products C3b and iC3b. C3 is the most abundant complement protein in serum. C3 and its cleavage products, C3a and C3b, play a central role in the complement activation cascade. C3b forms an integral part of the C3 and C5 convertases as it promotes complement activation and the subsequent formation of the membrane attack complex. C3a possesses anaphlatoxic as well as various immunoregulatory properties.

Also, C3 has been implicated in developmental and non-inflammatory process such as hematopoiesis, skeletal and vascular development and reproduction.

Reported applications of this antibody include flow cytometry and ELISA.

**PRESENTATION:**

**Purified:** Purified IgG buffered in PBS and 0.02% NaN₃. (Purified from ascitic fluid via Protein G Chromatography). For maximum recovery of contents, spin down tube before use.

**APC, Biotin, FITC and PE:** APC/Biotin/FITC/PE conjugated IgG buffered in PBS, 0.02% NaN₃ and EIA grade BSA as a stabilizing protein to bring total protein concentration to 4-5 mg/ml.

**STORAGE/STABILITY:**

For all formats, store at 4°C. DO NOT FREEZE APC, PE conjugates. For long term storage (Purified, Biotin and FITC), aliquot and freeze unused portion at -20°C in volumes appropriate for single usage. Avoid freeze/thaw cycles.
SPECIFICATIONS:

Clone: 6C9

Hybridoma Production:
Immunization:
  Immunogen: human C3
  Donor: C3 kko Mouse spleen cells
Fusion Partner: Sp2/0-Ag14 cells

Specificity: Human and Mouse Complement Component C3

TEST RESULTS:

Mouse Strain: C57Bl/6
Cell Concentration: 1x10^6 cells per test
Antibody Concentration Used: 0.5 µg/10^6 cells

Percentage of cells stained above control: 97%

C57BL/6 mouse thymocytes incubated with rabbit anti-mouse T cells and then incubated with fresh human serum were stained with anti-C3/C3b/iC3b (clone: 6C9) (filled histogram) or mouse IgG1 isotype control (open histogram).

N.B. Appropriate control samples should always be included in any labeling studies.
* For optimal results in various applications, it is recommended that each investigator determine dilutions appropriate for individual use.
