Detergent-Free Total Protein Isolation Kit

(Cat# 30300)

NEW

Mass Spec Ready

- Simple protocol that is free of detergents
- Process a variety of samples including cells, tissues, bacteria and yeast
- Isolated proteins are ready for mass spectrometry without further processing

If you are working with proteins containing salts, detergents or other contaminants we also supply a variety of kits for clean-up and concentration:

Kit	Cat#
CBED (Concentration, Buffer Exchange and Desalting) Micro Kit	10100
CBED (Concentration, Buffer Exchange and Desalting) Maxi Kit	17000
ProteoSpin Detergent Clean-Up Maxi Kit	17100
ProteoSpin Total Protein Concentration Kit	22000
ProteoSpin Detergent Clean-Up Micro Kit	10200
ProteoSpin Total Protein Detergent Clean-Up Micro Kit	23300
Detergent-Free Total Protein Isolation Kit	30300
Abundant Serum Protein Depletion Kit	17300
ProteoSpin On-Column Proteolytic Digestion Kit	17500
Urine Protein Concentration Micro Kit	17400
Urine Protein Concentration Maxi Kit	21600
ProteoSpin Endotoxin Removal Micro Kit	22800
ProteoSpin Endotoxin Removal Maxi Kit	22200
ProteoSpin Inclusion Body Protein Isolation Micro Kit	10300
ProteoSpin Inclusion Body Protein Isolation Maxi Kit	17700

Features

- Fast and convenient spin-column format
- Remove greater than 99% of salts and detergents
- Rapid and convenient alternative to dialysis
- High protein recovery
- No molecular weight cutoff
- Complete kits with columns and solutions
